

Scrum #1 stand up questions

What have you done?

- **Lazlo:** Pulled the project from github and got it running in Eclipse, added new tasks to trello and product backlog
- **Cindy:** Created subtasks for requested features.
- **Kayla:** Set up the Sprint 1 Report and booked today's scrum room.
- **Alex:** Wrote up plans to develop features for the front end.
- **Veda:** Created subtasks for a majority of the features.

What are you going to do?

- **Lazlo:** Learn cucumber and write black-box testing for restaurant search radius
- **Cindy:** Set the radius of the restaurants search task
- **Kayla:** Redownload Eclipse and Tomcat, create the UI box for setting the radius for the restaurant search task on the search page, add the group photo to the github, and include the link to the photo in the repository to the report.
- **Alex:** Implement radius input (task 8), further develop pagination.
- **Veda:** Start implementing the backend logic for security/confidentiality tasks

What are you blocked on?

- **Lazlo:** Have not yet thoroughly read through the design diagrams and new codebase to understand how it works
- **Cindy:** Front-end for task 8 is not complete, can't connect backend to frontend yet.
- **Kayla:** I can't open the jsps right now because my Eclipse isn't working properly, but I deleted it and am redownloading it so I can continue to work on frontend with ease for the rest of the project.
- **Alex:** Need to get project running on local Eclipse machine.
- **Veda:** Nothing because I'm a baws, jailbroke my mind
